## Oysta Watch

LW

- Status alerts
- One-touch SOS Button
- Safe/No Go Zones
- Auto-answer & loud speaker
- All-In-One device
- Discreet appearance

Oysta Technology lead the way in the provision of lone-worker technology. Oysta lone worker solutions, specifically designed to track activity, locate, and connect lone-workers in need to 24/7 assistance, are relied upon by organisations from all industry sectors throughout the UK and Europe.

### Introducing the Oysta Watch

Designed for everyone who performs activity without close or direct supervision of others, the Oysta Watch features sophisticated tracking and communication for indoor and outdoor lone worker safety.

Looking like and worn like a regular watch, the Oysta Watch uses GPS and LBS positioning to track and monitor lone worker location 24/7.

Satisfying legislation for lone-worker safety and protection, the Oysta Watch provides a reliable lifeline for those working independently from a wider team.

Offering two-way voice communication, with optimised battery life, the Oysta Watch carries with it CE and RoHS certifications.

### The device

Designed to look like a digital watch, the Oysta Watch actually works like a regular watch, with date, day and time display.

Additionally, the Oysta Watch includes a one-touch SOS button, which, when triggered will automatically activate hands-free, two-way voice communication between the user and an Operator.

## Key features & benefits

### All-in-one

The Oysta Watch is not only a digital watch with time, date and day display; it allows two-way communication just like a mobile phone (with speaker and microphone) as well as accurate GPS location data. This ensures that wherever the employee is, help is always at hand.

### One-touch SOS Button

When the SOS Button is triggered the Oysta Watch sends location details to the chosen monitoring centre, automatically starting a hands-free voice call.

### Safety zones

The Safety Zone feature enables safe geographical areas to be set. Monitoring movement in/out of zones at set times, an alert will be raised in the event of any activity outside of the boundaries.

### Two-way voice communication

Enabling the employee to speak to a real person when they are distressed or in crisis, the Oysta Watch features two-way voice functionality to provide reassurance and a more personal approach to assistance.

### Reminder messages

Able to send simple messages to a dispersed employee, the Oysta Watch can support daily management through the dissemination of tasks and reminders.

### Status alerts

Enabling management teams to know when the device is turned on/off and charging/battery levels. Optional 'no activity' feature, to detect if the Oysta Watch is not being worn or used.

### Waterproof

High-grade IP66 Waterproof, the Oysta Watch can be worn in any work environment without compromise to its performance.

### Location tracking

Tracking location, IntelliCare via the Oysta Watch collates tour/patrol/ shift history.

## The IntelliCare platform

The Oysta Watch provides huge benefits to organisations and their high-risk workers, thanks to Oysta's powerful IntelliCare platform.

Via the Oysta Watch, dispersed staff have the means to check-in, communicate and initiate help in routine or emergency situations. IntelliCare collects and presents this live intelligence providing insightful information for management teams.

Using the IntelliCare platform, managers of lone workers can:

1. Accurately see the location of the employee, now or over time, view check-ins, initiate a call or update devices.
2. Generate reports and graphics by time, and over some or all lone worker devices, thanks to the detailed information that IntelliCare collates.
3. Set zones to wherever the individual is working: indoors or outdoors, locally or remotely, altering them to any anomalies to location or routine.
4. Remain SLA compliant by evidencing proof of presence
5. Monitor battery status, alerts and usage, enabling teams to optimise lone worker safety, as well as ensuring investment is being used.

SPECS	
CPU	MTK2502C-ARM7
Memory	128M+64M
Screen	1.54" IPS Full View, full fitting LCD, capacitive touch screen
Resolution	240*240 pixels
BT	4.0
Case Material	Stainless steel
Watch band	Silicon Rubber
Charging	Magnet inductive charging
Battery	Li-polymer 320mah
